

EXP 4: WEB FORM DEVELOPED USING SERVLET PROGRAM

AIM:

To create a web form that accepts a user's name and age, processes the data using JavaScript, and displays the submitted details with a stylish UI and animations.

ALGORITHM:

1. **Start**
2. **Design the Web Form:**
 - Create an HTML form with two input fields:
 - Name (Text Input)
 - Age (Number Input)
 - Add a submit button.
3. **Apply CSS Styles:**
 - Use a gradient background, smooth input effects, button hover effects, and animations.
 - Style the form, inputs, button, and result display area.
4. **Write JavaScript for Form Handling:**
 - Attach an event listener to the form submit event.
 - Get user input values (name and age).
 - Validate input fields (ensure name is not empty and age is valid).
 - If validation fails, show an alert.
 - If valid, display the submitted details dynamically.

5. Show Output Dynamically:

- Use JavaScript to update the UI and display the submitted data in a formatted box.
- Use smooth animations for better user experience.

6. End

PROGRAM:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>User Form</title>
  <style>
    /* Import Google Font */
    @import
url('https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;600&display=swap');

    /* Page Styling */
    body {
      font-family: 'Poppins', sans-serif;
      background: linear-gradient(135deg, #ff9a9e, #fad0c4);
      display: flex;
      justify-content: center;
      align-items: center;
      height: 100vh;
      margin: 0;
      animation: fadeIn 1s ease-in-out;
    }

    /* Form Container */
    .container {
      background: white;
      padding: 25px;
      border-radius: 12px;
      box-shadow: 0px 5px 15px rgba(0, 0, 0, 0.2);
      width: 350px;
      text-align: center;
      transition: transform 0.3s ease-in-out;
    }
```

```
.container:hover {  
    transform: scale(1.05);  
}
```

```
h2 {  
    color: #ff4d6d;  
    font-weight: 600;  
    margin-bottom: 15px;  
    text-shadow: 1px 1px 2px rgba(0, 0, 0, 0.2);  
}
```

```
/* Input Fields */
```

```
label {  
    font-weight: 600;  
    color: #444;  
    display: block;  
    margin: 10px 0 5px;  
}
```

```
input {  
    width: 100%;  
    padding: 10px;  
    border: 2px solid #ff4d6d;  
    border-radius: 8px;  
    font-size: 16px;  
    outline: none;  
    transition: all 0.3s ease-in-out;  
}
```

```
input:focus {

    cursor: pointer;  
    width: 100%;  
    font-size: 18px;
```

```

    font-weight: 600;
    border-radius: 8px;
    margin-top: 15px;
    transition: background 0.3s ease-in-out, transform 0.2s;
}

button:hover {
    background: #ff165d;
    transform: scale(1.05);
}

button:active {
    transform: scale(0.95);
}

/* Output Box */
.output {
    display: none;
    margin-top: 20px;
    padding: 15px;
    border-radius: 8px;
    background: #e0f7fa;
    color: #00796b;
    font-size: 16px;
    text-align: left;
    box-shadow: 0px 4px 10px rgba(0, 0, 0, 0.1);
    animation: slideIn 0.5s ease-in-out;
}

/* Animations */
@keyframes fadeIn {
    from { opacity: 0; transform: translateY(-10px); }
    to { opacity: 1; transform: translateY(0); }
}

@keyframes slideIn {
    from { opacity: 0; transform: translateY(20px); }
    to { opacity: 1; transform: translateY(0); }
}
</style>
</head>
<body>
    <div class="container">
        <h2>Enter Your Details</h2>

```

```
<form id="userForm">
  <label for="name">Name:</label>
  <input type="text" id="name" name="name" required placeholder="Enter your name...">

  <label for="age">Age:</label>
  <input type="number" id="age" name="age" required placeholder="Enter your age...">

  <button type="submit">Submit</button>
</form>

<div class="output" id="output"></div>
</div>

<script>
document.getElementById("userForm").addEventListener("submit", function(event) {
  event.preventDefault(); // Prevent form submission

  let name = document.getElementById("name").value.trim();
  let age = document.getElementById("age").value.trim();

  if (name === "" || age === "" || age <= 0) {
    alert("⚠️ Please enter a valid name and age.");
    return;
  }

  // Display the submitted data with an animation
  let outputBox = document.getElementById("output");
  outputBox.innerHTML = `<b>Name:</b> ${name}<br><b>Age:</b> ${age}`;
  outputBox.style.display = "block";
});
</script>
</body>
</html>
```

OUTPUT:

The image shows a web form titled "Enter Your Details" on a light pink background. The form is a white rounded rectangle with a subtle shadow. It contains the following elements:

- Title:** "Enter Your Details" in bold red text.
- Name Field:** A label "Name:" followed by a light blue input box containing the text "Meenakshi Ganesan".
- Age Field:** A label "Age:" followed by a white input box containing the number "20".
- Submit Button:** A red rectangular button with the text "Submit" in white.
- Confirmation Box:** A light blue rounded rectangle at the bottom containing the text "Name: Meenakshi Ganesan" and "Age: 20" in dark teal.

RESULT: The creation of web form using servlet program was executed successfully.
